DETAILED ACTION

Specification

1. The application has not been checked to the extent necessary to determine the presence of all possible typographical and grammatical errors. However, Applicant's cooperation is requested in correcting any errors of which he/she may become aware in the application.

Note: at paragraph [0051], line 3, (2P =23=8) should read as ($2^P = 2^3 = 8$).

Correction is required.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the **resistor** as recited in claims 1 & 6 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 2819

of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "**120**" has been used to designate in **Figures 1, 5A, 6A, and 8**. The reference character "**120**", as indicated in Figure 1, is an ADC circuit; and for the same reference character "**120**", as indicated in Figures 5A, 6A, and 8, does not appear to be as an ADC circuit [If it is an ADC circuit, where is its output(s)?].

Clarification or corrected drawing sheets in compliance with 37 CFR 1.121(d) is/are required in reply to the Office action to avoid abandonment of the application. Any amended replacement of drawing sheets should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2819

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1 & 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims are indefinite and/or unclear because the drawings do not show clearly a circuit or device as being claimed, including: an ADC implemented using switched capacitors for receiving a reference signal from a first node; and a resistor connecting the output terminal of the reference buffer and to the first node. Clarification and/or correction is required.

Claim Objections

6. Regarding claims 2 & 9, each of these claims recites, "...wherein a resistance value of the resistor substantially equals (A-B-C)..." what does it means by (A-B-C)? Does it mean B and C are subtracted from A? If so, these features must be shown. Clarification/ Correction is required.

Regarding claims 3-5, 7-8, and 10-12, these claims are objected because they depend on the claims that are in questions.
